EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Title:

Delete the current title and replace it with the following.

-- Film scanning device for receiving either strip film or a slide mount utilizing a single photographic sensor --.

In the Abstract of the Disclosure:

Delete the current Abstract and replace it with the following:

-- A film scanning device using the same CCD light sensor for pictures of strip film and for a slide mount also comprises a body having a strip film transport path disposed there through. The transport path has a first opening in the body for inserting a developed strip film, a second opening in the body through which the developed strip film exits the body, and a third opening for inserting and pulling out a slide mount juxtaposed vertically relative to the strip film transport path. --

The following is an examiner's statement of reasons for allowance:

In independent claim 1, the phrase "a photographic sensor that takes pictures of the strip film in the first opening and/or the slide mount in the third opening" may be directed to a single embodiment. Therefor the rejection in the previous Office Action of December 4, 2002 under 35 U.S.C 112 directed to said phrase is withdrawn. The prior art of record neither shows nor suggests a film scanning device having all of the elements of claim 1, and in particular comprising a third opening disposed in the body of the film strip for inserting and pulling out the slide mount such that the third opening is juxtaposed vertically relative to the strip film transport path; and also an actuator located proximate to the first and second openings of the body to actuate an actuating mechanism in combination with a photographic sensor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brandestini et al. U.S. Patent 6,304,344 B1 teaches an image digitizing system.

Hoshino et al. U.S. Patent 5,933,222 teaches a film scanner.
